Onshore Experience

- 4 years @ Johannesburg
- 1 year @ London

Technical Skills

Programming Skills

With Hands-on

- Python Scripting
- Terraform
- Bicep
- ARM Templates
- Ansible
- PowerShell
- Bash
- JavaScript
- HTML5, CSS, Bootstrap
- SQL
- COBOL, JCL, VSAM
- IBM DB2, CICS
- REXX, Easytrieve

Without Hands-on

- Java
- C#
- Node JS

Platform Skills

With Hands-on

- Azure Cloud
- Xamarin
- Android
- Mainframe

Without hands-on

- AWS Cloud

Professional Summary

With 14 years of experience in the IT industry, I specialize in architectural solutioning and design, cloud enablement and migration, business process transformation, DevOps implementation, service modeling, configuration management, infrastructure management, and the automation of infrastructure and application support. My expertise spans major banks and financial organizations in South Africa, the UK, and the US. I am a detail-driven, interactive, and initiative-taking techie with a quick grasp of new concepts and an unwavering automation mindset. I believe in consistent delivery and continuous skill development, always striving to bring out the best in myself and my team.

Work History

Senior Technology Architect

2nd Feb 2024 – Current

Accenture – Chennai

- Designed and implemented a Secure Cloud Foundation tool for customers, facilitating a secure and accelerated onboarding process into Azure.
- Developed comprehensive Application Migration Designs for various Greenfield and Brownfield projects, spanning multiple technologies such as Java, .NET, and Python, ensuring successful cloud migrations.
- Assisted Brownfield Azure cloud customers in resolving technical debts related to networking, identity, security, automation, DevOps, and process improvements.
- Extensive hands-on experience as an Application Architect, Infrastructure Architect, Security Architect, and DevOps Architect in migration and transformation projects.
- Helped customers create and optimize Azure Cloud Bill of Materials, resulting in significant cost savings.

Solution Architect

27th Sep 2021 – 1st Feb 2024

Accenture – Chennai

- Designed infrastructure for multiple AI use cases on Azure Cloud.
- Created High-Level and Low-Level Designs for application migration projects.
- Leading 8+ assets/tools and 5 asset teams in Azure Infrastructure GSA Capability.
- Developed tools to accelerate cloud and application onboarding and migration to Azure Cloud.
- Deployed large cloud environments with thousands of services, providing solutions for secure and efficient management.
- Created Kubernetes-based solutions for customers and successfully implemented them.
- Proficient with DevOps tools such as Jenkins, Azure DevOps, GitLab, Docker, GitHub Actions, and Nexus for cloud and on-premises deployments.
- Experienced in managing multiple cloud environments hosted under multiple tenants in a Hub and Spoke network topology.
- Served as Automation Lead, assisting a major retail customer in building their cloud environments using Terraform and Azure DevOps, transforming their unmanaged cloud infrastructure to a managed state with Terraform.

Frameworks

With Hands-on

- Django
- Flask
- BDD

Without Hands-on

- MERN Stack

DevOps Tools

With Hands-on

- Jenkins
- Git
- Gitlab
- GitHub
- Jira
- Docker
- AKS
- Azure Functions
- Lambda
- Confluence
- Bitbucket
- Docker
- Kubernetes
- AppDynamics
- Nexus
- Delphix
- Azure DevOps
- SonarQube
- Helm
- Cucumber & Selenium
- ServiceNow
- Remedy
- CyberArk

Without Hands-on

- Compuware
- Subversion
- Splunk
- AWS ECS
- Black Duck

Transformation Lead

2019 – 24th Sep 2021

Wipro Technologies – Chennai & UK (London)

- Designed and developed a tool to automate the pre- and post-closure business activities of the Temenos24 core banking application for a retail and commercial bank in the United Kingdom.
- Delivered cloud migration strategies from on-premises, continuous improvements through automation, and efforts reduction via optimization, resulting in significant cost savings.
- Automated cloud deployments and validations using Terraform and Python scripting.
- Extensive hands-on experience with CI/CD tools such as Bitbucket, Git, GitHub, GitLab, and Jenkins.
- Designed and developed a collaborative service modeling tool that integrates with BMC-Remedy, allowing visualization of business and technical services for effective impact analysis before changes.
- As the Test Environment Management Transformation lead, implemented automated test environment and application provisioning, and automated application deployments using Azure DevOps Pipeline.
- Designed a web application for automated health checks of an entire test environment landscape, covering five environments and 12+ core applications for a bank.
- Researched and implemented Neo4j to visualize service models, facilitating the viewing of all configuration items (CIs) and their relationships within the project landscape.

DevOps and Automation Lead

2016-2019

Wipro Technologies – Chennai & Johannesburg (South Africa)

- With experience in Python scripting, I have developed numerous in-house tools for continuous process improvements and troubleshooting. I have implemented CI/CD pipelines using Jenkins, Docker, Azure DevOps, GitHub, GitLab, and Bitbucket, significantly enhancing automation and efficiency.
- Full-stack development experience includes scripting and building dashboards using Python, Flask, Django Framework, HTML5, CSS, Bootstrap, jQuery, and SQL. Successfully delivered projects that improved data visualization and user interaction.
- Proficient in using the Python data science package “Pandas” with hands-on experience applying it to configuration management for a bank, automating the manual troubleshooting process and reducing errors and downtime.
- Provided technical leadership on multiple small-scale projects, defining, and implementing technical solutions for project proposals that enhanced efficiency and met client requirements.
- Utilizing self-taught Python skills, I created two packages, “Swapdate” and “SQLPandas,” now available on the Python developer forum (PYPI), contributing to the open-source community and discussion forums.
- Developed Python modules for auto-healing issues identified by the environment support team. Created a tool using Python and Django, later introduced as a self-heal bot, which improved system reliability and reduced manual intervention.
- Conducted comprehensive training sessions on Python and REXX scripting languages for various teams, encouraging the adoption of automation techniques, which resulted in increased productivity and reduced manual tasks.

Senior Project Engineer

2014-2016

Wipro Technologies – Chennai & Johannesburg (South Africa)

- Automated the troubleshooting process across Mainframe, SAP, frontend technologies, web solutions, and cloud environments, reducing incident investigation turnaround time from 3 days to 15 minutes.
- Built a test/dev Mainframe environment from scratch and developed GATE (Gap Analyzer for Test Environments) using REXX, which identified gaps in test environments, saving 44 resources 8 weeks of effort and USD 366K for the client.
- Developed the JCL CHECK Tool, Edit Macros, and GATE for creating new test environments, reducing planned effort from 18,029 hours to just 270 hours.

Product Profile

- BMC Discovery
- BMC Remedy
- ServiceNow
- Tivoli Workload Scheduler (TWS)
- File-Aid
- Azure CLI
- Azure Terrafy
- Azure Storage Explorer
- Azure IaaS, PaaS, SaaS
- Oracle
- SQL Server
- PostgreSQL
- Kusto
- Neo4j
- Azure Edge
- Postman

Project Engineer

2011-2014

Wipro Technologies – Chennai & Johannesburg (South Africa)

- Designed and developed 18 Mainframe tools as part of the Continuous Improvement Process, leading to significant savings in cost, effort, time, and Mean Time to Recovery (MTTR), thereby ensuring delivery excellence.
- Optimized daily application batch jobs that were consuming excessive MIPS and DASD maintenance, resulting in cumulative savings of USD 8,500 for the customer.
- As part of the Lean initiative "Batch Incident Reduction," permanently resolved twenty-five data errors, reducing incidents by 600 per month.

Certifications

- Accenture Certified: Senior Technology Architect – 2024
- Microsoft Certified: DevOps Engineer Expert – 2024
- Microsoft Certified: Azure Solution Architect Expert – 2024
- Microsoft Certified: Azure Administrator Associate – 2024
- Microsoft Certified: Azure Security Engineer Associate – 2024
- Microsoft Certified: Azure Fundamentals – 2024
- Wipro Certified: Mainframe Solution Architect – 2020
- IBM Certified: Application Developer Cloud Platform V2 – 2018

Accomplishments

2022 – Feb	Skills Star Award – Awarded for demonstrating exemplary innovation and passion.
2021 – April	Inspiring Performance - Awarded for extra ordinary performer in transformation track.
2018 - August 2014 - December	Business Unit Awards - Awarded for exceptional performance in project delivery across BU and extending support to other Business Unit for Automation. Also identified as dream team member.
2018 - April	Pleasure to work with you - Awarded for guiding the team members on any technical issues to get a solution.
2017 – December	You Made a Difference - Awarded for outstanding continuous delivery.
2017 - November	Winners in Hackathon competition conducted by the customer for an idea of "Creating Account for a customer using his biometric detail in ATM and emboss & dispatch card through ATM itself".
2017 - January	Winners in Hackathon competition conducted by the customer for developing a mobile app for customers Real-Estate team.
2016 - January 2015 - October	Victory League - Awarded for collaborative working and going beyond deliverables.
2015 - August 2015 - June	Round of Applause - Awarded by the clients for innovation and collaborative teamwork. Got best team award among the BPI teams.
2014 – February	The JCL CHECK Tool and Batch Alert Tool I developed were recognized as 1st and 2nd Runner-up for the 'BEST PRAGATIS' award at the CIEA BFSI contest for the year 2013-14.
2013 – September	Recognized as " Domain Level Innovation Expert " at the account level for creating eighteen tools.

Academic Summary

B.E – Electronic & Communication Engineering National Engineering College, Kovilpatti. (2006-2010)
